

PROFESSIONAL SUMMARY

Backend-focused .NET Engineer with **Three (3)** years of experience building and scaling production-grade ASP.NET Core APIs for enterprise clients. Hands-on experience in microservices architecture, asynchronous messaging using Azure Service Bus, and migration of legacy .NET Framework services to .NET Core. Proven ability to design high-performance backend systems serving 80K+ daily users, with strong expertise in Oracle databases and Azure cloud services. and Led migration of legacy .NET Framework APIs to .NET Core, resulting in improved performance, scalability, and reduced technical debt. Designed and implemented background batch processing jobs in .NET to handle large-scale Oracle DB updates, ensuring data consistency and operational reliability

SKILLS

- Backend: ASP.NET Core Web API (.NET 8), REST APIs, Microservices, JWT, OAuth
- Languages: C#, Java (working knowledge), Python (basic)
- Data & ORM: ADO.NET, Entity Framework, LINQ, Oracle DB, SQL
- Cloud: Microsoft Azure, Service Bus, Blob Storage, Key Vault
- Scalability: Pagination, Async Messaging, Background Jobs
- Domain: GIS, ArcGIS Pro
- Tools: GitHub, Postman, Visual Studio

PROFESSIONAL EXPERIENCE

1. Tech Mahindra Ltd, Pune (Software Engineer) | Full Time Job - Total Experience 2.4 years

Nov 2023 - Present

Client: AT&T (Telecommunications)

(Pune, Maharashtra)
- Project 1: Waldo Portal (High-scale backend system supporting AT&T’s internal network planning and asset inventory)

- Developed and maintained high-availability .NET backend services supporting 80,000+ daily users across AT&T’s internal engineering ecosystem.
 - Migrated legacy .NET Framework APIs to .NET Core, improving performance, scalability, and long-term maintainability.
 - Integrated Azure Service Bus for asynchronous, decoupled communication between backend services owned by different teams, and implemented Azure Blob Storage for backend-managed file storage and Azure Key Vault for secure secret and credential management.
 - Built background batch processing jobs in .NET, scheduled via Windows Task Scheduler, to handle large-scale data ingestion and Oracle DB updates.
 - Implemented automated error detection and email alerting for backend services and batch jobs, reducing operational overhead and MTTR.
 - Created and maintained backend service inventory and workflow documentation to support stakeholders and onboarding.
 - Collaborated directly with AT&T stakeholders to translate business requirements into backend system design and APIs.
- Project 2: Zero Demand (GIS-Based Backend Platform for identifying business opportunities in underground cable infrastructure)

- Designed and developed scalable .NET Core REST APIs from scratch to process and expose geospatial ground cable data.
 - Built backend services capable of handling 68,000+ data records per request, and implemented efficient pagination to optimize response time, memory usage, and database load.
 - Implemented centralized authentication, authorization, and role-based access control (RBAC) for secure API access.
 - Developed event-driven email notification services to inform users of workflow state changes.
 - Created Oracle database triggers and stored procedures to automate backend data processing and enforce business rules.
 - Owned and maintained backend service workflows for cable infrastructure tracking and demand analysis.
 - Optimized data access patterns using Entity Framework to ensure stable performance under heavy data loads.

2. PHN Technology Pvt. Ltd, Pune (.NET Programmer) | Internship - Total Experience 0.6 years
- Apr 2023 - Oct 2023
(Remote)
- Developed and optimized RESTful APIs using ASP.NET Core, ensuring seamless communication between front-end components and back-end databases.
 - Utilized C# to implement business logic and data validation, improving the overall reliability of the application features.
 - Collaborated with the senior development team to participate in code reviews and debug existing software modules, reducing post-release bugs.

EDUCATION

- Bachelor of Technology (B.Tech) in Computer Science and Engineering
Dr. Babasaheb Ambedkar Technological University, Lonere
Year: 2023 | 8.39 CGPA
- Higher Secondary Certificate (HSC – Class 12)
Maharashtra State Board of Secondary and Higher Secondary Education
Year: 2019 | 74.77%
- Secondary School Certificate (SSC – Class 10)
Maharashtra State Board of Secondary and Higher Secondary Education
Year: 2017 | 92.20%

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) — Microsoft
- Build ASP.NET Core Web API – Scratch to Finish (.NET 8) — Udemy
- AI White Belt Certification – Tech Mahindra

ACHIEVEMENTS & INTERESTS

- Bravo Award, Tech Mahindra — recognized for consistent delivery and quality of work.
- Active Member, JOSH Initiative, Tech Mahindra — contributed to organizing internal engagement and cultural events.

LANGUAGE

- English
- Hindi
- Marathi
